Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 14 and 15 are objected to because of the following informalities: in claim 14, line 9, --the-- should be inserted before "base". Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 3-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fumagalli (EP 0 806 714).

With regards to claims 1, 3, 4, 8, 11, 14 and 15, Fumagalli discloses an appliance and a method of assembling appliances wherein a base unit of an appliance is used to form different models by the use of a control panel comprising a plurality of open electrical contacts that can be closed selectively and thus create different models of an appliance from a base unit, see column 1, lines 52-58, column 2, lines 1-20, column 4, lines 7-20 and the abstract. Fumagalli does not provide a plurality of control consoles but rather a single console with interchangeable keys to as to produce different models of the appliance. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made that Fumagalli's appliance and method are an improvement over Applicant's claimed invention of providing different versions of the

control console, see column 1, lines 43-48. Fumagalli's single console with interchangeable keys is advantageous in that it lessens the cost of manufacturing different models of the same appliance.

With regards to claims 5-7 and 9-11 and 13, Fumagalli discloses a method of assembling appliances as shown above except for the console mounting being done at a retail establishment, by an appliance dealer, at the purchaser's home, by a dealer representative or at a regional warehouse. However it would have been obvious to one of ordinary skill in the art at the time the invention was made that having the mounting of the console done at a retail establishment, by an appliance dealer, at the purchaser's home, by a dealer representative or at a regional warehouse is an obvious matter of design choice wherein no stated problem is solved or unexpected results obtained in having the control console mounted in one place or another. Applicant should note that the types of appliances disclosed are not typically self-installed type of appliances. They are typically delivered and installed by professionals (dealer representatives) at the purchaser's home and the appliances typically come assembled to a degree where transportation to the purchaser's home would be done safely without damaging the appliances. Delicate parts that could be damaged during delivery are typically installed at the purchaser's home. Furthermore in Fumagalli's method, the end user "changes" the console simply by inserting a particular key instead of replacing the whole console.

Response to Arguments

4. Applicant's arguments with respect to claims 1 and 3-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
